

Graduate Program Opportunities

Biological Engineering

Supervised by Prof. Amar Mohanty and Prof. Manjusri Misra

Research Area: Bio-based Polymeric Materials and Engineering

Funded Graduate Opportunities – PhD/M.A.Sc./MEng in Biological Engineering

The Doctor of Philosophy, Master of Applied Science & Master of Engineering in Biological Engineering is a full-time program based on coursework at the School of Engineering and research intense program conducted at the Bioproducts Discovery and Development Centre, University of Guelph.

Location:	University of Guelph, Guelph, Ontario, Canada
Entry Terms:	Fall, Winter or Summer Semester
Deadlines:	Applications will be accepted on an ongoing basis
Degree Requirements:	Masters degree requires Bachelors degree in Science or Engineering PhD requires thesis-based Master degree in Engineering

About BDDC

BDDC is a well-resourced facility, unique to Ontario, provides opportunity for companies, entrepreneurs, and research organizations to partner with university-based researchers toward development of commercial new biomaterials, bioplastics, biocomposites, biochemical and process technologies.

The BDDC is staffed by graduate and post-doctoral students working in the areas of polymer science, chemical engineering, advanced material science and applied microbiology.

Commercial application of research results is a guiding principle for the BDDC. Innovations coming from the BDDC help companies in their efforts to reduce greenhouse gas emissions and their environmental footprint.

Visit us at

bioproductscentre.com

University of Guelph is an equal opportunity employer.

Graduate Opportunities

There are several openings for graduate students wishing to pursue a Graduate degree in the research areas listed below:

- 3D Printing of Bioplastics and Biocomposites
- Bioplastics and Biobased Polymers
- Biocomposites (Natural Fibre Composites) and Polymer Blends
- Green Composites including recyclability, durability and biodegradability studies
- Biobased Nanocomposites and Nanoblends
- Biomass and Biomaterials Sustainability
- Biomedical Applications for Bioplastics and Biocomposites
- Value-added Biobased Materials from the Coproducts/Byproducts of Biofuel Industries
- Biodegradability (Compostability)

Research component of the graduate school requirements will be conducted within the Bioproducts Discovery and Development Centre (BDDC), University of Guelph. The candidate will have the opportunity to work with senior scientists from different areas (materials science and engineering, chemical engineering, mechanical engineering, polymer chemistry, packaging and plant agriculture) and will have the chance to work collaboratively with industrial partners.

Qualifications

1. For entry in the PhD program in Biological Engineering (School of Engineering), candidates must hold a Masters degree in Engineering (Thesis-based)
2. If your first language is not English, you will be required to submit the results of a standardized language test*. Please see the chart for [English Language Proficiency Requirements](#).

(www.uoguelph.ca/graduatestudies/future/international/english)

*[Language Proficiency Department Requirements](#) for the School of Engineering.

(www.uoguelph.ca/engineering/grad/application-process)

How to Apply

Application to the BDDC selection committee (*only short-listed candidates will be contacted*)

Each application package must be labelled accordingly and contain:

1. Cover letter outlining qualifications for the specific position applied and earliest date of availability, if selected; (**File Name: Last Name_Cover Letter_Date**)
2. Two-page summary outlining your interest and motivation to work in the Bioproducts Discovery and Development Centre (BDDC) (information can be found on the website www.bioproductscentre.com/). Please include how your background will help you to succeed on these topics researched at BDDC and how you plan to learn about the aspects you don't know; (**File Name: Last Name_Summary_Date**)
3. A reverse chronologically complete CV (Curriculum Vitae) which includes (**File Name: Last Name_CV_Date**):
 - a) Training information and Degrees obtained (Work Experience and Education) - Including high school (including start and end date - month and year)
 - b) Thesis title of your degrees (if applicable)
 - c) Name of adviser for your degrees (if applicable)
 - d) Percent average or GPA (if including GPA please provide what it is out of i.e. 4.36/5.0)
 - e) Timeline and summary of gaps between degrees starting from high school (to be included in the training information and degrees section)
 - f) List of courses during your education most relevant to this position and grades obtained for each course,
 - g) English Language Proficiency results and sub-category breakdown (IELTS, TOEFL, etc.)
 - h) List of your publications and presentations, and
 - i) Contact information for three references.;
4. Your scientific publications in pdf format. (**File Name: Last Name_Publication#_Date**) Publication Number should correspond with the list number in your CV

Please send your pre-application package with the above documents to bddcjobs@uoguelph.ca copying mohanty@uoguelph.ca and mmisra@uoguelph.ca with the subject heading "Graduate Studies in Biological Engineering"

Professor Amar Mohanty

Director, Bioproducts Discovery & Development Centre (BDDC)
University of Guelph Research Leadership Chair
Professor, Department of Plant Agriculture & School of Engineering
University of Guelph; ON, Canada, N1G 2W1
mohanty@uoguelph.ca
[Personal School of Engineer Website:](http://www.uoguelph.ca/engineering/people/amar-mohanty)
www.uoguelph.ca/engineering/people/amar-mohanty

Professor Manjusri Misra

Professor, Biological Engineering
School of Engineering
(Cross appointed: Department of Plant Agriculture)
Tier 1 Canada Research Chair (CRC) in Sustainable
Biocomposites
University of Guelph, Guelph, Ontario, N1G 2W1
mmisra@uoguelph.ca
[Personal School of Engineering Website:](http://www.uoguelph.ca/engineering/people/manjusri-misra-phd)
